Target audience: Home Portal's users

Entity Name drop-down menu	Select the required type of information, you want to have exported, from the drop-down menu. In some system areas you can only export one type of data. In others, you can select what type of data to export.
Name drop-down menu	<p>Select the view you want to use from the drop-down menu. The view which includes the set of columns with data. This set of columns will be included in the formatted file.</p> <div style="border: 1px solid orange; padding: 5px; margin-top: 10px;"> <p><b>Export Views != Browse Views</b>                      The Export views are not the same as the Browse views. For example, if you have created a view that allows you to browse only active customers, you will need to recreate it in the Export Data window before you can export it.</p> </div>
Export type drop-down menu	<p>To use the exported files with other applications select what column separator should be used in the exported file. From the drop-down menu select which separator might be used in .csv files: :</p> <ul style="list-style-type: none"> <li>A file where columns are separated by semicolons;</li> <li>A file where columns are separated by commas;</li> <li>A file where columns are separated by tabs.</li> </ul>
Export button	Click to download the .csv file. Depending on your Web browser settings a file manager window might appear asking you to choose the location where you want to download the generated file. If the file manager window does not appear, the file will be downloaded automatically to your predefined or default location.
Cancel button	You can click this button to abandon data exporting action and close the Export Data pop-up window.
