

CAT Analysis Import

When creating CAT payables and CAT receivables, you can import CAT analysis files from multiple CAT tools instead of entering the information manually.

The CAT tools from which the analysis (log) files can be imported to XTRF are listed below, together with the lists of supported file formats:

Name	File Format	Comments
Across	HTML, XML	
Déjà Vu	CSV, HTML, LOG, TXT	LOG files supported in English and Spanish. TXT files supported from XTRF v2014 Autumn 3.4.18.
Fortis	LOG	
Idiom	CSV	
Idiom Workbench	TXT	
Logoport	LOG	
memoQ 4.x and earlier	CSV, HTML, LOG	CSV files supported in English and German.
memoQ 5 and later	CSV, HTML	Supported CSV variants: 'Reflecting displayed results', 'Per-file', 'Per-file Trados-compatible'. Limited support for 'Post-translation' CSV analyses. 'Chars per word' parameter supported in 'Per-file Trados-compatible' analyses.
Memsources	CSV, LOG	CSV files supported from XTRF v2015 Winter 3.5.0.
Multitrans	HTML, XML	
SDL Passolo 2009	HTML	
SDL Passolo 2011	HTML	
SDL TMS	HTML	
SDL TMS 2009	HTML, MHT, XML	
SDL TMS 2011	HTML	
SDL Trados	CSV, LOG	
SDL Trados Studio 2009	HTML, MHT, XML	With or without 'Report internal fuzzy match leverage' turned on). Supported files generated in English, Chinese, French, German, Japanese or Spanish.
