

# Integration with Third-Party Systems

Information about integrating XTRF with third-party software or web services, including CAT tools (mainly memoQ, Memsource, SDL Trados Studio and XTM) and accounting systems (QuickBooks, Visma, Sage 50, 1C)

For details, please see the relevant section:

## External Processes

A type of Automatic Actions, External Process (available in the Workflows sections) allows XTRF to run a third-party program with predefined parameters for the purpose of automatic processing of project files.

## EasyLing

EasyLing <http://www.easyling.com> is an advanced tool which allows for easy translation of websites. The translation project management, which is run in EasyLing, can be integrated into XTRF and help LSPs run their website translation projects as a single smooth workflow.

## WeLocalize

The integration with WeLocalize <http://www.welocalize.com> allows XTRF to perform synchronisation with WeLocalize's system called Falcon.

## Other Integrations

This article contains information about other software and web services that XTRF can integrate with.

## Salesforce (DEPRECATED)

The integration of the XTRF system with Salesforce.com <http://www.salesforce.com> ensures smooth co-operation between the sales and production departments of a translation company.

## Integration with CAT Tools

## Integration with Accounting Systems

XTRF is integrated by different means of technology communication with several accounting systems: QuickBooks, Visma, Sage 50, DATEV Mittelstand pro, 1C.
