

Vendors Module

What's here?

In the Vendors menu, you can manage your vendor's information, which includes their price profiles and contact persons. In addition, you can also create and configure price lists which you can apply to vendors who do not have their own price profiles.

The image shows a red rectangular graphic with three white icons representing people (two circles for heads and two rectangles for bodies) and the word "Vendors" in a large, white, sans-serif font at the bottom.

Vendors Module Elements

[Smart Views - Vendors](#)

[Browse Vendors](#)

The Browse page is where you can search your system for providers. You can also create, modify or delete providers.

[Create - Provider](#)

You can create a provider by manually entering the provider's information into the XTRF system.

[Contacts - Browse - Provider](#)

The Provider Contacts Browse is where you can search your database for your providers' contact persons.

[Smart Views - Price Profiles - Vendors](#)

The Vendor Price Profiles Smart View page is where you can search the database for the price profiles of your vendors.

Price Lists - Browse - Provider

The Browse Providers Price Lists page is where you can search the database for the price lists applied to your providers. Here you can also create or modify the price lists for the providers.
