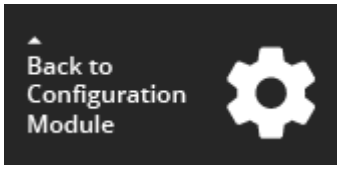
Logs - Smart Connectors - Integration

License Agreement
The article presents the features available in the Premium plan of XTRF Language Business Platform. Please keep in mind that your access to the described options might be limited due to your license agreement. If you would like to change your plan of XTRF Language Business Platform and gain access to the additional features, contact your XTRF Customer Success Manager.

Target audience: Home Portal's users



Logs tab

In the Logs tab you can track the Smart Connector's process. You can find information whether any errors occurred and see their source. In the Robot Code you can also specify when and what kind of additional logs appear in the Logs section. In the example provided in the picture above, log entries such as information about target languages are inserted manually into the Robot Code.

Save button	Click this button to save the settings.
Save and Exit button	You can click this button to save the settings and return to the Smart Connectors list. This button is available only when you are editing an existing Smart Connector.
Cancel button	Click this button to discard all the changes and go back to the Smart Connectors list.
Exit button	You can click this button to return to the Smart Connectors list. This button is available only when you are editing an existing Smart Connector.
Test button	The button appears when the Smart Connector is saved. You can click this button to test whether the Smart Connector can access the folder mapped in Base Directory, and to make sure the settings for projects created by this Smart Connector are correct. Click this button to start the test. Test Smart Connector pop-up window appears. Please refer to the Smart Connector - Technical Guide, section Testing Smart Connectors Configuration to learn more about testing Smart Connectors. This button is available only when you are editing an existing Smart Connector.
