Reports Module Elements

Smart Views - Reports

Nonconformity Report

On this page you can browse all issues which occurred in your projects. After finding the desired claim, you click on it in order to access the flagged project's Feedback tab. In the Feedback - Project tab, you can review and if necessary, respond to the reported issue.

Evaluation Report

The Evaluation Report tab provides the average ratings a provider has for specific language combinations. You can review the information included in the table in order to recognise which providers provide exceptional or poor work for a given language combination.
