

Browse Virtual Columns - Customization

License Agreement

This article presents the features available in the Ultimate plan of XTRF Translation Management System. Please keep in mind that your access to the described options might be limited due to your license agreement. If you would like to change your plan of XTRF Translation Management System and gain access to the additional features, contact your [XTRF Customer Success Manager](#).

Target audience: Home Portal's users

- Configuration accordion menu
- Search Filter panel
- Virtual Columns list

Virtual Columns display

The screenshot shows the 'Virtual Columns' configuration page. On the left is a 'Configuration accordion menu' with categories like 'General Configuration', 'Customization', 'User Management', etc. The 'Virtual Columns' option is selected. The main area is titled 'Browse Virtual Columns' and contains a 'Search Filter panel' with input fields for Name, Role Name, and Expression, and a dropdown for 'Type is any of' (options: Any, Entity Name, HTML, Plain). To the right is a table of virtual columns.

Name	Class Name	Role Name	Expression
Standard Page	File Statistics		<code>#if (\${this.characterWithSpacesCount}) #set (\$standardPage = \${utils.unwrap(\$this).characterWithSpacesCount} / 1800.0) \$utils.roundUp(\$standardPage) #end</code>

If you need any non-standard column in any area of the Home Portal, you can add it in the Virtual Columns subsection of the configuration menu. The virtual columns can take every possible form and can be added in various areas of the Home Portal.

Configuration accordion menu

In the Configuration accordion menu you can find Virtual Columns section in which you can view and edit virtual columns currently available in the Home Portal as well as add new virtual columns.

Search field

As soon as you start typing a search query, XTRF Platform displays a list of search results. It is an easy and convenient way to find the required section in the Configuration accordion menu.

Virtual Columns section

In the Configuration accordion menu go to the Customization Virtual Columns subsection to get displayed the list of virtual columns currently available in the Home Portal of XTRF Platform.

Search Filter panel

You can limit your search results for desired entity within the Search Filter settings.

Search button	Click to begin filtering the data.
Reset Filter button	Click to restore the default settings of the Search Filter options.
Search Filter options	Search Filter options are available on the display of your search results. You can use one or, if specified, within one operation. All Search Filter options are for a given object. For example, you can provide a name phrase in the Name field at the same time as entities.
<div style="border: 1px solid green; padding: 5px;"> <p>Configure Search Filter Options You can configure the Search Filter options most frequently used ones. To find out more about the Search Filter panel to your needs, go to the pop-up window article, section Filter tab.</p> </div>	
Displaying Search Filter panel	<p>To adjust the width of the filter, click and hold  icon. While holding the icon, move your cursor to the left side of the screen to decrease or to the right side to increase filter.</p> <ul style="list-style-type: none"> To close the filter, click the highlightable  icon. To open the filter, click the highlightable  icon.
